

# A C T I V A T I O N S

## checklist

### Activate YYC

- We considered overall design aesthetic (plan for colors, theme)
- We have a plan for how the space will be maintained (consider repairs, vandalism, all weather, wind damage, etc)
- We have considered how long this will be in place for and have a plan for removal or maintenance, seasonality
- We have all applicable permits, agreements and permissions in place prior to installation
- We have insurance in place if needed
- We have community support or built awareness of this project
- Consider signage on site – this is a community led pilot, who to call with any issues – be fun and engaging and let people know you are trying something new
